The people in the neighborhood, who are the ones to profit by this opening of the park in the cool evening hours, were loud and earnest in their delight at the rendy espousal of their needs and right by THE EVENING WORLD.

This may be put down as another of these popular triumphs for THE EVENING World, the paper not only of, but emphatically for, the people. In this case the restitution of their own to the people came so quickly upon the paper's demand that the park should be opened to recall Capt. Scorr's coon, who told the Captain ' not to shoot, that he would

All THE EVENING WORLD desires in such itters is that an easy, simple justice shall be done to those who have the fewest to maintain their claims and yet who, as a rule, are of the strongest desert.

WOMEN OFFICIALS.

The high respect due to the gentler sex seemed to have been beautifully illustrated out in Edgerton, Kan., when a numher of women were elected to municipal itions. To use an old paradox, the town is manned by women.

That is, it seemed to be. But now the men, hateful, horrid things, have come forward and said they ran the women folk in just for fun. and they have kicked violently against the large and womanly cheme of town keeping which the fair officials had inaugurated.

They had planned to lay pavements clean the streets, sit on the cider joints, and furbish up the civic belongings in a thorough business-like way. But when they saw themselves antagonized by their false-hearted patrons the wrath of the nen rose and they resigned.

This is very sad. When woman is dis This is very sad. When woman is dis-posed to be helpful and economical why belongs to the public. Mrs. Cleveland was hand to her side. should is arouse such opposition in the manly spirit? Can this be jeslousy?

A ROMANTIO TURK.

No one would have supposed that a man born within a short radius of the Golden Horn could have been fired with a monogamous desire for the hand of a blushing Jersey girl. But ALI BABA SINIAN was that man.

He read an "ad" of Miss Braman's and wrote to her. She answered. Love's gentle fiame was softly fanned by subsequent writing, and then ALI left the prosale wilds of Chicago to come east for

Little boys should not be encouraged in using their papa's rifles on the cats who wall to the midnight moon in their areas. One boy who shot at a melodious Tom missed him extravagantly and sent a ball whistling into the neck of a good man who chanced to be somewhere in the vicinity. If the offending cat must be assailed nothing more deadly than the bootjack should be fired except by an experienced shot.

A new worm, devoted to the destruction of fresh clover, has appeared in Jersey. Why this State should be the scene of en deavor of these hateful pests is unaccountable. One would fancy that the squito was quite enough woe for Jermey without the introduction of brandnew pests within its borders.

Speaking about the contemplated extension to the White House Mrs. U. S. Grant said & I hope Mrs. Harrison will succeed in getting the annex. If she does she will merit the blessing of the future mistresses of that lovely old mansion. When we lived in Washington we actually suffered for want of room. Of course there were a great man; of us and as we needed all the rooms, there were no facilities for entertaining. One can't hold office and disregard the amenities for if intimate and dear friends do not call in person their claums revert to other friends who in turn deserve and desire some special attention. I remember we used to invite friends to spend two weeks with us, and in order to get through our list an invitation would be sent to another friend whose visit would begin with the close of the first. Some accident would detain the first, prolonging her visit a day or two, and while I could not show any feeling I was seriously inconvenienced, and a message had to be sent or provision made for a suite at the hotel, because there was only one guest chamber in the White House In the end everything came out nicely, but the hitches were, to say the least, bothersome. I doubt if my word was not questioned when I used to tell friends that I would invite them to spend a while with us if there was any room. They doubt-less looked at the spacious parlors on the main floor and judged the living rooms by their standard. As every habitus of the White House nows, there is no privacy whatever in

WORLDLINGS.

Zola is one of the most extravagant of men, and notwithstanding his princely income he is com-paratively poor. The greater part of his fortune has been spent on his estate in Meadon, with its astle, park and pavilions.

The famous French author, Daudet, is in his orty-ninth year. Though not wealthy, he has a modest fortune, and his house is a meeting place for delightful people. Personally the great novelist is extremely attractive.

ATHLETES IN REPOSE.

"Billy" Coster, the football player of the New York Athletic Club, has developed con-siderable science as a boxer, and will probably enter the heavy-weight competitions next year. Sam Cramer, the Passime Athletic Club athlete, is one of the finished varsuem of the Dauntless Boat Club—"finished" in a technical sense. He has by no means finished winning squatte glory.

Max Lau, who is rowing in the junior Atalanta eight, is an expert wrestler and clever boxar. He is an athlete all through.

Capt. Frank Connell, of the Dauntiess Rowing Club, is one's best ideal of an earsman. In two years he went up in weight from 135 to 175 pounds, the latter his present weight, the increase is all due to rowing.

As morphine taking may be considered

a species of insanity, it is not strange, therefore, that the victims resert to cunning devices to procure the drug or to conceal their fatal weakness.

A case of this kind was recently brought to light in a Massachusetts convent, where, among the pupils was one of Boston's fairest daughters, of wealthy and aristocratic parents.

The first time, perhaps, he will fall into a sound sleep. The second time, though, he will not sleep sound.

Delightful faccies fleat before his narcotized brain and the victim imagines all sorts of beautiful things.

The fancies that float through a morphine fleud's brain are described as wonderful and would take up columns of anace to describe. The body of the pretty fifteen-year-old girl which was found on Saturday floating in the East River, off pier 28, has been identified as Lizzie Dollard and removed to the home of her sister, 91 Ellery street Brooklyn.

The girl was of a buoyant, hopeful nature, and the trouble she is said to have had with her brother on the week previous to her dis appearance did not seem to weigh heavil usen her, although it may have led her t the dose he wants.

He will figure that there are sixty finish drops to a dram. There being eight drams to the ounce, this would make the preparation of two grains of morphine.

Easy reckoning thus shows that every drop contains one-thirtieth of a grain of morphine.

By easy stages the dose is increased. The appetite becomes more and more imperative in its demands, and the poor victim has to keep on increasing the dose in order to get the full effect of the drug.

It no longer is a pleasure to take it. It is a duty. The method of taking it is by

It no longer is a pleasure to take it. It is a duty. The method of taking it is by injecting it under the skin.

The most common place for doing this is on the lower limbs, though many prefer the arm just above the elbow.

The skin is carefully pinched up from the flesh and then the needle by a quick thrust is driven under it. The syringe generally contains more than the dose actually needed. This is done in order to prevent any air from being injected under the skin.

Should this happen painful abscesses result and the inexperienced victims generally get three or four of these before they become bandy with the syringe.

Morphine is cheap. It is only a cent a grain, and it can be procured by almost any one in any drug store.

The pharmacists make a show of denying morphine to any but those who have prescriptions, but they find it had to give up one of the most profitable branches of their business.

Still there are many reputable men who positively refuse it without a prescription. Should this happen painful abscesses result and the inexperienced victims generally get three or four of these before they become bandy with the syringe.

The pharmacists make a show of denying morphine to any but those who have prescriptions, but they find it hard to give up one of the most profitable branches of their business.

Still there are many reputable men who positively refuse it without a prescription. The frauds are wary, however, and can write their own prescriptions, signing the name of some fictitious doctor.

If by any chance they are deprived of their "dope," their condition becomes pittable. The poor beings suffer the tortures of the damned. It is food and drink and life to them, and when they cannot get it their features become diatorted, their cyballs sink deep into their heads, and pains rack the body from the want of it, and not infrequently goe some hear of a victim's death from an overdone.

O'Connell was the maiden name of Mrs. Ward, but her father died five years ago and her mother recently married the man Richards, a decent, sober mechanic.

The drungen orgies of mother and son had so annoyed the neighbors that the landlord gave them notice on Saturday to quit. To-day they were to go out.

Mrs. Richards vowed to get square with the landlord and to make things hot in the house before she left it, and she kept her promise.

Saturday night she and her son Daniel started out on a debauch, which they kept up through the night. The growler went up and down those stairs until daybreak, and by that time mother and son were fighting drunk.

tools, with which they intended to force open the large safe in the bank.

They had been in the bank but a short time, and had hardly got flown to their work of breaking open the safe when they were discovered by Marshal Smith He gave the alarm and aroused a number of the prominent citizens, isoluding ex-Supt. Walling.

The old Chief or Police seized a shot-gun and joined in the chase for the thieves, but they managed to get away.

The burglars left the tools lying on the floor in the bank, and as far as known nothing was stolen. Antonio Capastino, an Italian, thirty-two years old, of 205 bouth Fifth avenue, was arraigned before Judge McMahon, in the combs Police Court this morning, to anawer for stabbing Charles Simmons, negro, who keeps a restaurant at 47 Baxter

Fe-tairant.

Simmons ordered them away and a quarrel followed, during which Capastino plunged a dirk-knife into his abdomen.

Simmons fell to the addwalk and Capastino ran away. He was afterwards captured by Detectives Farrington and Chrystalladge Relianon held him to await the result of dimmons's injuries.
